Jun 28—TBA

July 05-No Meeting in honor
of our Independence Day.

July 12—TBA

Mei 24, 2019

CLUB SERVICE EVENT

Mālama Hulē`ia Community Project

Here we go – supporting a major community project. The Alakoko Pond or most call it Menehune pond is an historic and ecological project that has many years in the making.

This **Saturday, May 25**, starting at 8:AM, we'll help the Malama Hule`ia project. The project ends at noon and lunch is served. When you arrive at the location (drive pass The Kauai Inn on Halemalu Rd the first road before you go up the hill) or give President Jim a call and he'll direct you where to park car and to start the tasks of either planting or removing the red mangrove. If you are staying for lunch, please RSVP at info@malamahuleia.org or call 808 626-5210.

The bad thing about alien invasive species is that they tend to take over and make over whatever habitats they move into. **Red mangrove** is especially good at creating its own habitat – one in which it can thrive and hardly anything else can survive. The

dense jungle of roots and branches it produces slows the flow of water, traps silt and blocks out sunlight. The heavy litter of leaves and propagules it drops decay and rob the water of oxygen. When the bottom litter has grown thick and the water is shallow enough, then new propagules take root and increase the density of the mangrove. Meanwhile, prop roots descend from increasingly higher positions on the growing tree, expanding the tree's footprint and enabling it to suck greater

While the mangrove trees are being cut down by a small group of skilled Menehune, much work remains to stack the debris of roots and branches and transport them to the chipper. When the land is clear, we will also need much help to replant the area with native vegetation. If you can lend a hand, we will be able to meet our current goal of clearing red mangrove and other invasive vegetation from around the Alakoko Fish-pond in two years.

Of the things we think, say or do:

The 4 – Way Test
Is it the truth?
‘oia`i`o i keia `ōlelo?
Is it fair to all concern?
kūpono ia kākou?
Will it build goodwill and better friendships?
kūkulu loko maika`i a me, pilialoha maka`i a`e?
Will it be beneficial to all concerned?
pono ia kākou?

“Rotary is a leadership organization”

“We’re made up of local business, professional, and civic leaders. We meet regularly, get to know each other, form friendships; and, through that, we’re able to get things done in the community”.

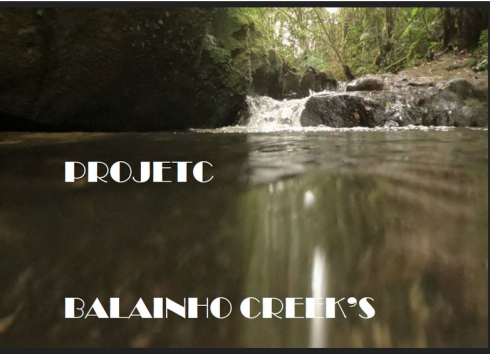

We meet at
Nāwiliwili Yacht Club
2494 Niumalu Road
Small Boat Harbor—Lihū`e
Noon on Fridays
Order Lunch 245-3322
Plantationcoffeecompany.com
From the website lunch menu, call in your order.

Start Planning Your Project Now!

Cleaning the Rivers of the World, a project of the Rotary Club of Ukiah South (District 5130, Northern California), provides support, leadership and fellowship for Rotarians and the projects they inspire to clean our rivers locally and globally.

The project, initiated by Rotarian Salvador Rico, has created a network of partnerships including Rotary clubs and Rotarian Action Groups to inspire, promote, and recognize the projects being undertaken around the world.

Educational materials on the challenge and best practice approaches are available in English and Spanish. The partnership with the **Water and Sanitation Rotarian Action Group (WASRAG)**, the **Rotarian Action Group for Peace (RAGFP)**, and the

Environmental Sustainability Rotarian Action Group (ESRAG) provides a model of the fellowship that grows within Rotary.

Among other things, Cleaning the Rivers of the World has initiated a semi-annual World Water Day Competition to recognize the **Most Innovative** and the **Most Impactful** river clean-up projects. The next competition deadline is May 1, 2019

Cleaning the Rivers of the World recognizes the fundamental role clean rivers play in our global initiative to rid the world of the wild polio virus.
